PERSONAL PROJECTS

MYn tune music player (07/2023 - Present)

- React Frontend I enhanced the music player by implementing play, pause, and skip song features. Additionally, I introduced a playlist shuffle feature for user enjoyment.
- Music player project I employed HSL.js, ensuring cross-platform compatibility. This allowed seamless playback on both Android and iOS devices, expanding our user reach significantly.

RideForSure (Schedule Ride) (12/2022 - Present)

- I built a user-friendly React frontend with a date-time calendar and smooth input handling. I integrated Razorpay for payments and collaborated effectively with the team for project success.
- I created vital Node.js middleware facilitating smooth communication between client and vendor APIs, improving project functionality and performance.

Admin Dashboard Cabs and Autos (05/2022 - 07/2022)

- I built react frontend dashboard to verify cabs and auto's driver and vehicle documents and information Also being used for real time statistics of ongoing rides information.

Weather-app (01/2021 - 02/2021)

- <https://aabishek-chaurasia-au17.github.io/Weather-app/>
- In this weather app get the weather details of a particular city by entering the city name or you can also get your current location weather details by clicking on the Search button.

FakeBook-heroku (MERN) (2021)

- <https://fakebook-app.herokuapp.com/>
- The App is called "FakeBook" and it is a simple social media app that allows users to post interesting events that happened in their lives.
